- **REFERENCES:** List of References should include only those published or accepted for publication works that are cited in the text. Use of footnotes or endnotes should be avoided as a substitute for a reference list. Ideally, the names of all authors should be provided, but for the long author lists "*et al*" can be used.

Following are two ways of citing the references and preparing the list of references

[A] Citations of the reference in the text by its number in a square bracket i.e. *1. Negotiation research spans many departments [3]; 2. This result was later contradicted by Becker and Seligman [5]. 3. This effect has been widely studied [1-3, 7].*

[A.1] Reference list: The references for such style should be listed and numbered consecutively in the order of citation.

[B] Citation of the reference by surname(s) of the author(s) directly (or parenthetically) and year of publications i.e. *as demonstrated (Allan and Jones, 1995). Kramer et al. (2000) have recently shown ....*

1. Single Author: the author's surname (without initials, unless there is ambiguity) and the year of publication; 2. Two Authors: both authors' surnames and the year of publication; 3. Three or more authors: first author's surname followed by 'et al.' and the year of publication.

[B.1] List of References: The references for such style should be arranged alphabetically.

Following are the examples of preparing the list of references
